- Dean's List

Computer Information Systems Work Experience

Coding Projects – “NetDoodler,” “Cosimous,” “Rat Races”

May 2016 - Ongoing

- “NetDoodler” is a self-inspired, self-drawn brand in order to attract clients and recruit business partners to form a small development team for freelance web design (Statistically, NetDoodler’s bounce rate is amazing at only 10.12%!).
- “Cosimous: Sage of the Multiverse” (Game demo is playable from www.netdoodler.com) is a dream project of mine where the user gets to traverse a multiverse where theoretical physics and existential philosophy clash together
- “Rat Races” was my most ambitious coding project where I programmed a pacman-esque game from scratch in C++ with original animation and music
- These projects, and others, can be found at: <https://github.com/maestroanth>

Technical Support at Cantitoe Road - Fort Collins, CO

December 2016 - Current

- Part-Time job where I’m responsible for creating business spreadsheets, ad listings (on Cantitoe Road’s website and Amazon), and some merchandise shipping
- First hand experience learning how to turn a profit for small businesses. Current reference is available upon request (Tom Petrie).

Music Teacher at Hourglass - Fort Collins, CO

January 2009 - Current

- Management responsibilities such as financial handling and charge rates
- Coordinated work schedules and payrates to increase revenue by 133%

USDA APHIS Web Developer (Intern)

August 2015 – May 2016

- Both backend and frontend development building responsive, dynamically called PHP pages through server calls and queries
- Assisted in recovering a failing project entitled “Beemites ID” that is now live at: <http://idtools.org/id/mites/beemites>.
- Assisted on maintaining an administrator portal for idtools.org called factsheet manager which uses a PHP/MVC backend system (Yii framework)
